Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-35 are pending in this application.

Restriction Requirement

1. Applicant's election without traverse of Group I in Paper No. 5 is acknowledged, however, the restriction requirement is hereby withdrawn and claims 1-35 are being examined in this office action.

Claim Objections

2. Claim 23 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 23 makes reference to the "the method of claim 11" however, claim 11 is drawn to a pharmaceutical composition.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1616

3. Claims 1-10, 21, 22 and 24-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,339,107 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are drawn to methods of treating emphysema with the only difference is that the patent discloses a specific dose amount (10 mg/kg).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-20 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bollag et al. (EP 0 579 915 A1).

Bollag discloses pharmaceutical preparations containing 9-cis- or 13-cis-retinoic acid or a pharmaceutically usable salt or ester. The composition can be used in various forms such as orally, enterally, parenterally, or topically. The retinoic acid can be used in concentrations from about 0.025 mg to about 1.5 mg. The prior art does not disclose the composition containing a pharmaceutically acceptable carrier that is suitable for aerosol devices or nebulizer devices.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to formulate the composition for use in aerosol or nebulizer devices. The prior art disclosed that the composition could be used to treat lesions of

the bronchi and autoimmune diseases such as asthma. It is known that aerosols or nebulizers are used to treat asthma and to deliver drug to the bronchi; therefore, it would have been obvious to formulate the composition as an aerosol so to deliver the composition to the lung.
